Welcome Trailblazer.

You’re here because you’re thinking about making the move to the Lightning Experience, right? Good call! We know it’ll make a huge impact on your business. How do we know? We just did a study of 500+ Salesforce customers who made the move to Lightning, and they saw an average 41% increase in productivity.

You read that right: that’s like adding three hours to every day, fifteen hours to every week for every Salesforce user at your company.

So how do you get started on your journey to Lightning?

It all begins with the Lightning Experience Readiness Check. This is a one-click assessment and planning tool that prepares a step-by-step guide for bringing Lightning online for your company.

As the process gets under way, the readiness check will help you identify which users are ready for Lightning Experience now, so they can be used in a pilot, and help you understand the value of rolling out Lightning to your whole team. And the great news is, you will maintain complete control at every step, managing who gets access to Lightning, the order in which they get that access, whether they have the option to switch back to Classic and more.

Get started on your move to Lightning today.

Run the Lightning Experience Readiness Check. It’s only a click, and you won’t regret it!
With Lightning Experience, we completely rethought the way you interact with Salesforce, to help you get more done with every click. Powerful new features include Lightning Console Apps, Lightning Dialer, and Salesforce Einstein. And a whole lot more!

“Other groups can’t wait to move to Lightning. They know their experience is going to get so much better.”

MARY OLSON FAJIMI, SENIOR SALESFORCE ADMIN, US AUTO SALES

There’s no question – if you’ve been waiting for the right time to get on board, that time is here. We have added a lot since we Launched Lightning in 2015. And more is coming with every release!

“We saved 43% in development costs by building it right the first time on Sales Cloud Lightning.”

BRAD KELLEY, AVP OF INFORMATION TECHNOLOGY, ELEMENTS FINANACIAL
