

U.S. Political Engagement: Policy, Oversight, and Disclosure

Current Update: H2 2019
Next Update: H1 2020

Policy

Introduction

At Salesforce, trust is our #1 value. We work everyday to earn the trust of all our stakeholders -- customers, partners, employees and the communities where we live and work. We are committed to a culture of transparency that builds trust. In this spirit, we publish semiannual updates about corporate political activities.

Salesforce participates in the legislative process in the U.S. by supporting candidates and causes that have a positive impact on our employees, communities and stakeholders. Salesforce supports candidates and eligible organizations who champion our policy priorities, align with our core values, represent and engage with significant numbers of our employees and demonstrate leadership. We are committed to complying with all laws, rules and regulations relevant to our political activity.

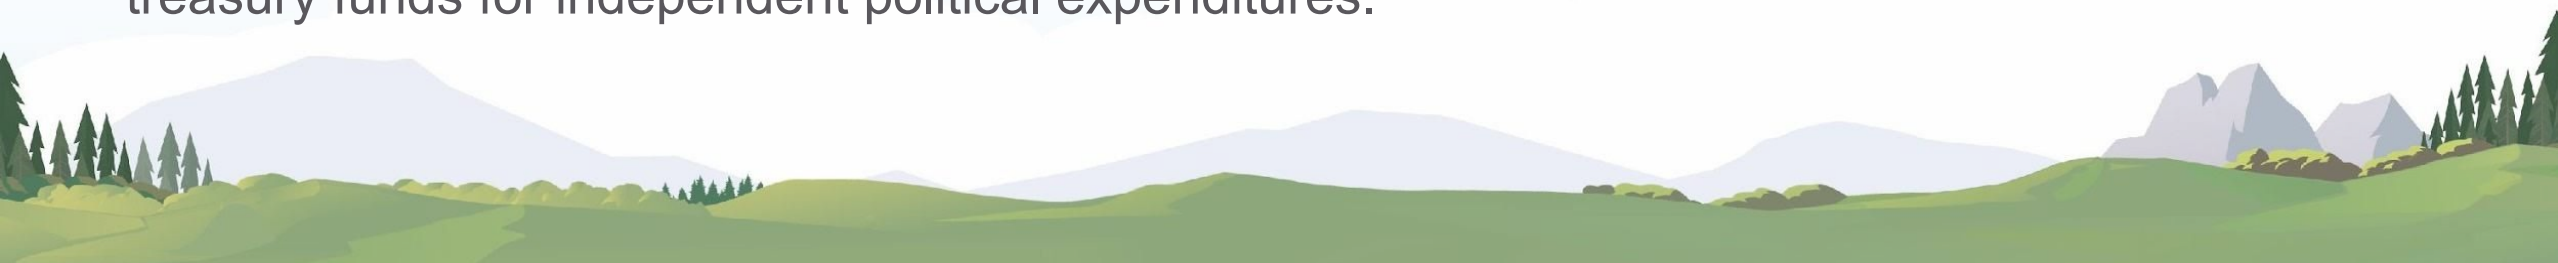

Contribution Eligibility

Salesforce is nonpartisan. We support candidates and eligible organizations of any party who share our priorities, even if we don't agree on every issue. All political contributions are made to promote the interests of the Company, without regard for the private political preferences of individual employees.

The Company does not use corporate funds or resources to support federal candidates and exclusively uses the Salesforce.com Inc Political Action Committee, as required by federal law. Where permissible by law, we contribute to state and local candidates and ballot measures through corporate expenditures. We also make corporate expenditures to support our membership in trade associations and contribute to other tax-exempt organizations, which may be used for political purposes.

We do not contribute to political parties, Super PACs, or 527 groups, nor do we use corporate treasury funds for independent political expenditures.

Political Action Committee

Corporations in the United States are not allowed to contribute directly to federal candidates. However, companies can organize and fund the establishment, administration, and solicitation expenses of an employee-funded Political Action Committee (PAC). Many companies in the U.S. choose to have an employee PAC.

The Salesforce.com Inc PAC was incorporated in 2012 to support public policies in the U.S. that align with our core company values. Funding comes entirely from voluntary contributions of eligible Salesforce employees. Employees are not reimbursed directly, through compensation increases or any other means, for personal campaign contributions.

The Salesforce.com Inc PAC is governed by an internal steering committee. We are committed to complying with FEC rules and regulations for PAC contributions, and we publicly disclose all PAC contributions in reports filed with the [Federal Election Commission](#), as required by law.

Corporate Expenditures

While corporations cannot support candidates for federal office, many states allow donations from corporate treasury funds to political candidates and ballot measures at the state and local level. Salesforce makes political contributions to support candidates and ballot measures that are aligned with our core values, in a similar manner to the process for PAC contributions. This includes the involvement of our internal steering committee. We abide by the laws of each individual state and jurisdiction in which we do business, and we are committed to complying with their campaign finance rules and regulations.

Trade Associations and Social Welfare Organizations

Like many corporations, Salesforce supports a variety of tax-exempt organizations, including 501(c)3 charitable organizations, 501(c)4 social welfare organizations, and 501(c)6 trade associations. This includes using corporate treasury funds to pay for memberships in these groups. By law, social welfare organizations and trade associations are permitted to use a portion of membership dues for political activities. Some, but not all, of the groups we belong to engage in political activities.

Although we support several groups that further our public policy interests and business goals, we do not always support all of the public positions of those associations or other companies that make up their membership. We review these memberships on an ongoing basis for alignment to our company's core values and priorities.

Policy Positions

Specific issues that form the basis for political spending decisions include:

- Artificial intelligence
- Cross border data flows and data protection
- Digital transformation in regulated industries
- Education
- Equal pay
- Equal rights
- Immigration
- Intellectual property
- Privacy and security
- Workforce development and skills

[Visit our Public Policy page for more information](#)

Political Spending Decisions

Our internal steering committee makes political spending decisions for PAC and corporate contributions to candidates. The committee includes representatives from business units outside of Government Affairs. Approval requires the support of 75% of the committee.

The Executive Vice President for Government Affairs has final authority over all of the Company's political spending. This position reports to the Company's President, Legal, and General Counsel, who reports directly to the Company's co-CEO. The President, Legal, and General Counsel shall approve all political contributions prior to disbursement, and the company's Chief Financial Officer shall approve all political contributions exceeding \$50,000.

The Nominating and Corporate Governance Committee of our corporate Board of Directors is responsible for regular oversight of our political spending.

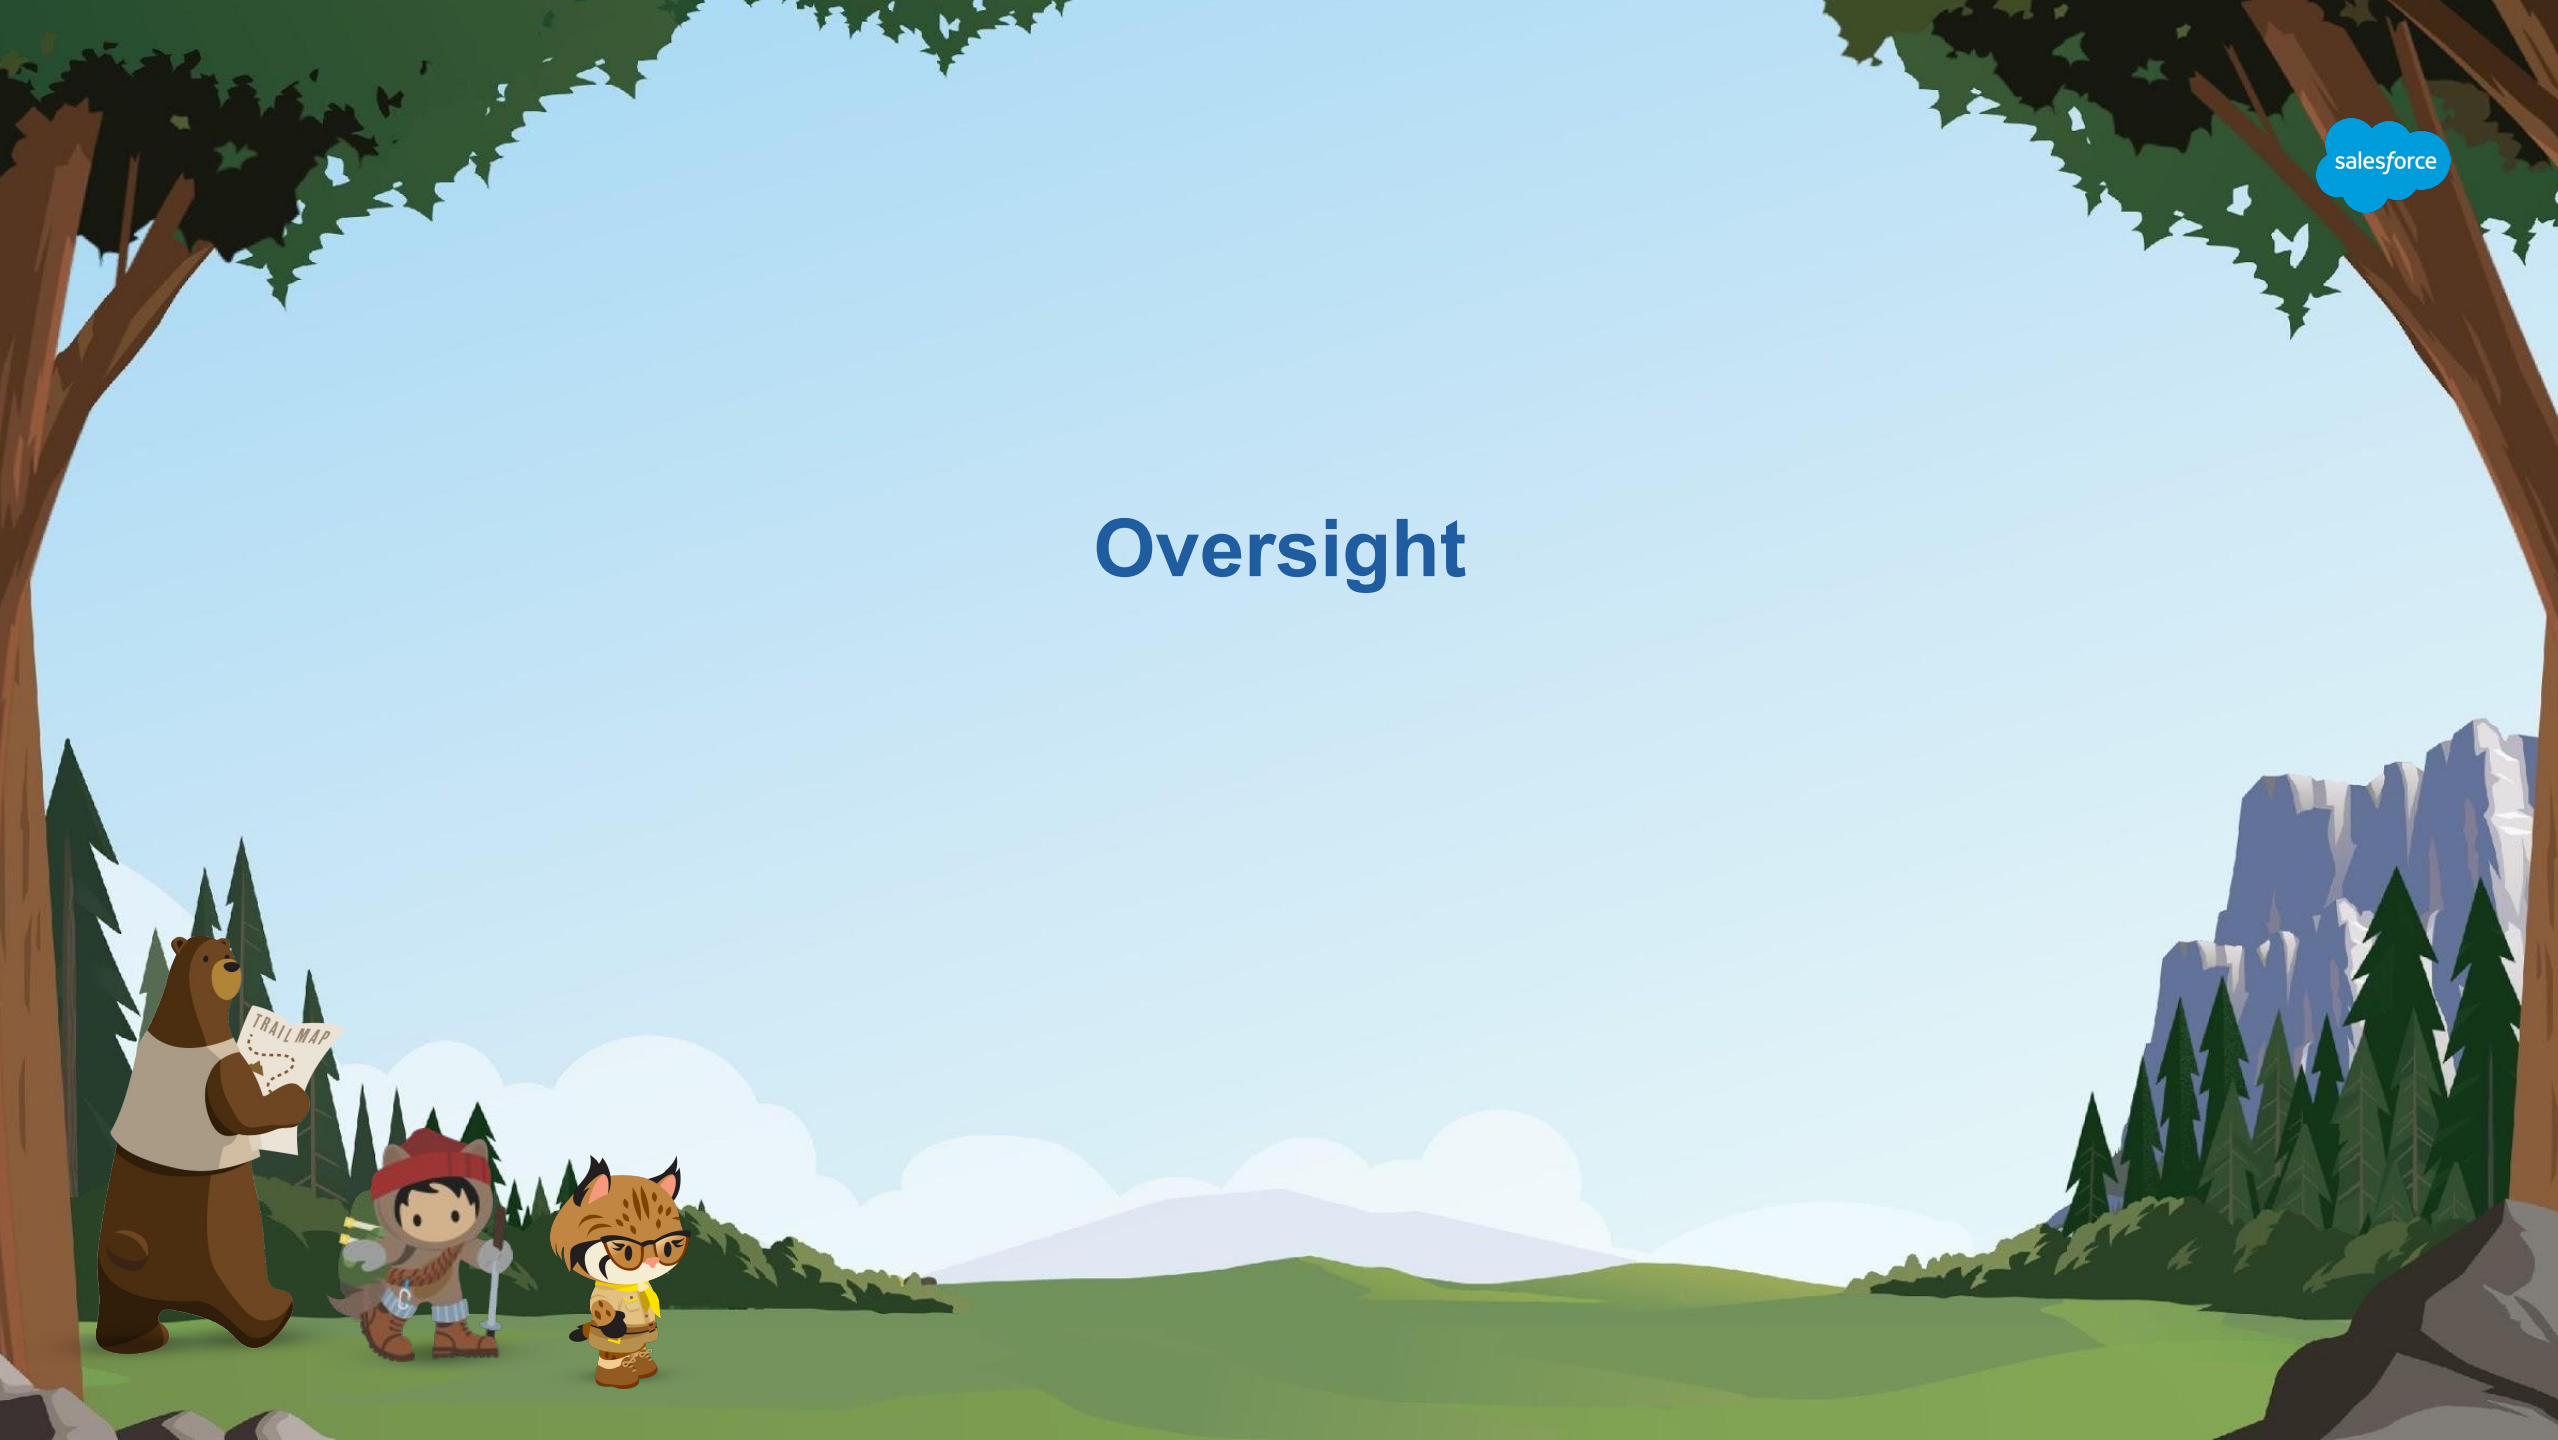

Lobbying

Salesforce files quarterly reports about our federal lobbying activity with the [U.S. Senate](#) and the [U.S. House of Representatives](#) in compliance with the Lobbying Disclosure Act. In addition, Salesforce files lobbying disclosure reports in each individual state and jurisdiction where we engage in lobbying activity, as local laws require. We are committed to complying with all laws, rules and regulations relevant to our lobbying activity.

Oversight

Board of Directors

The Nominating and Corporate Governance Committee of our corporate Board of Directors annually reviews our political contributions from corporate treasury funds and the Salesforce PAC. The Committee shall also review our company policy on political expenditures and payments to trade associations and other tax-exempt organizations that may be used for political purposes.

The Nominating and Corporate Governance Committee is composed entirely of independent directors. To view the current committee membership, please visit Salesforce [Investor Relations](#).

Compliance

A detailed report of corporate political spending is updated semiannually on a dedicated webpage accessible from our corporate homepage. To the best of our abilities, we include five years of historical data related to PAC contributions, corporate contributions, and contributions for memberships in U.S.-based trade associations and social welfare organizations.

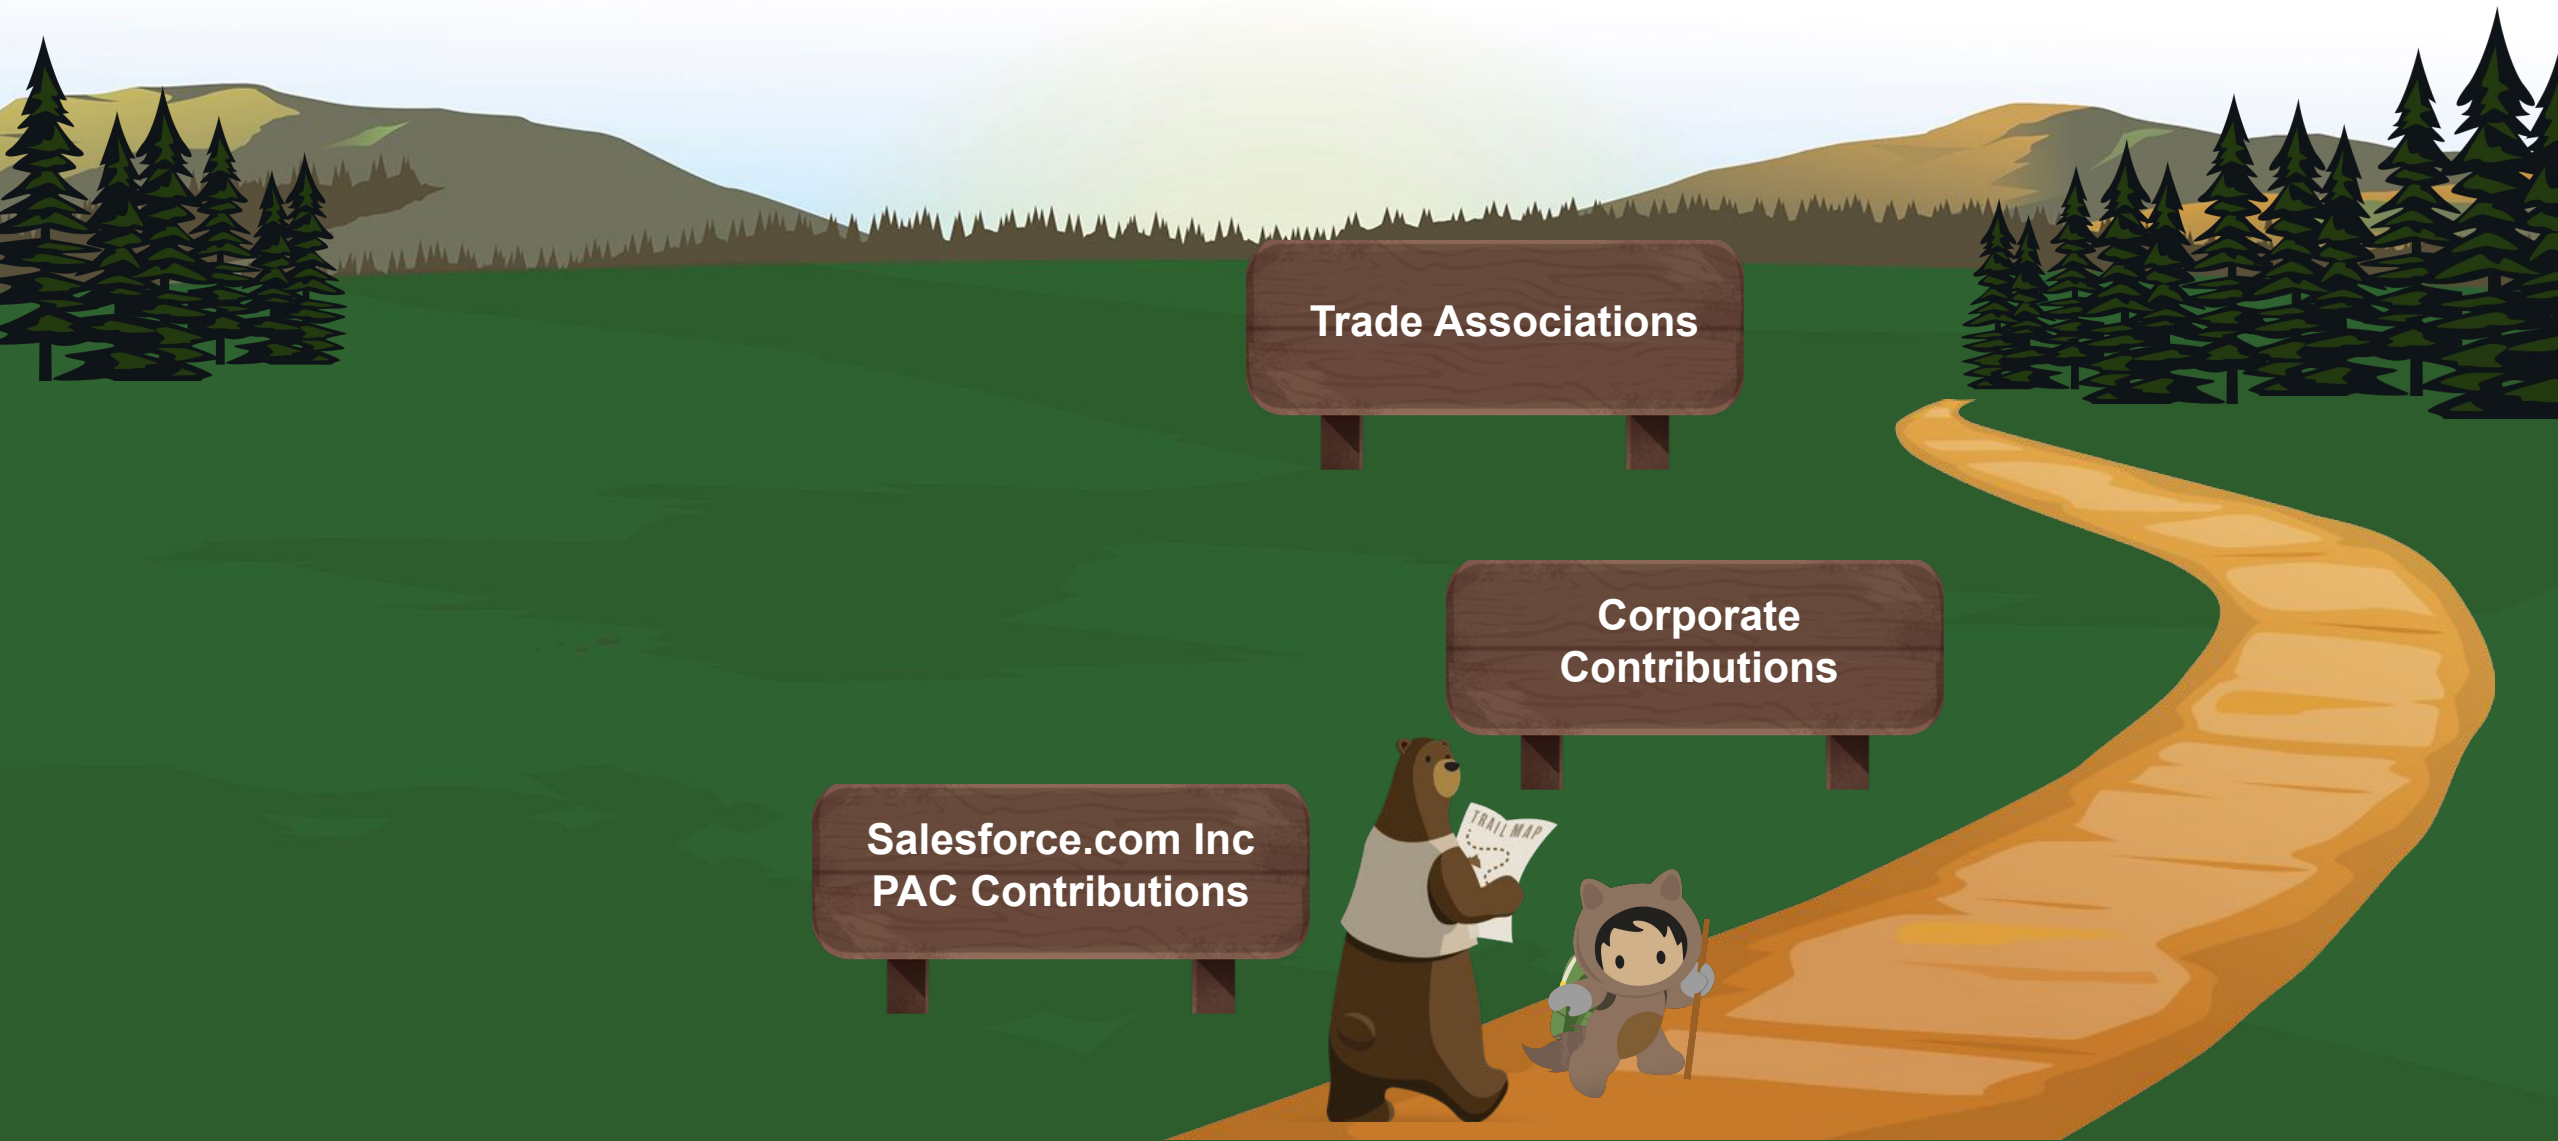

The Company has put internal processes for political spending in place to ensure that political contributions are made in compliance with our political spending policy.
